Rinse immediately with plenty of water for at least 15 minutes. Remove contact lenses, if presence and easy to do.

Seek medical advice in case of continuous irritation.

After ingestion

If conscious, give several small portions of water to drink. Do not induce vomiting.

Seek medical advice immediately and clearly identify substance.

4.2. Most important symptoms and effects, both acute and delayed

Any relevant information can be found in other parts of this section.

4.3. Indication of any immediate medical attention and special treatment needed

In case of contact with water, material splits off methanol in larger amounts; therefore consider poisoning on methanol and also observe known period of latency of several days.

Prevent material from entering surface water, drains or sewers and soil.

Contain any fluid that runs out using suitable material (e.g. earth).

Retain contaminated water/extinguishing water. Dispose of in prescribed marked containers.

6.3 Methods and material for containment and cleaning up

Do not flush away with water.

For small amounts: Absorb with a liquid binding material such as diatomaceous earth and dispose according to local regulations. Clean any slippery coating that remains using a detergent/soap solution.

Exhaust vapour.

6.4 Reference to other sections

Safe handling: Refer to section 7

Personal protection equipment: Refer to section 8

Disposal: Refer to section 13

7. HANDLING AND STORAGE

Advice on safe handling

Wear personal protection equipment (Refer to section 8).

Ensure adequate ventilation.

Keep away from incompatible substances in accordance with section 10.

Spilled substance increases risk of slipping.

Precautions against fire and explosion

Product can separate into methanol. Flammable vapours may accumulate and form explosive mixtures with air in containers, process vessels, including partial, empty and uncleaned containers and vessels, or other enclosed spaces.

Keep away from sources of ignition and do not smoke. Take precautionary measures against electrostatic charging.

Cool endangered containers with water.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage rooms and vessels

Keep container tightly closed in a cool, well-ventilated place.

Make sure there is no possibility of entering the ground.

Advice on storage compatibility

Do not store together with food and feeding stuffs.

Further information on storage conditions

Keep the packing dry and well-sealed to prevent contamination.

Recommended storage temperature: 20-25 °C.

Protect against: Moisture

7.3. Specific end use(s): Refer to section 1.

Use protective gloves made of butyl rubber. Gloves suitable for up to 60 minutes' use. The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye protection: Tight fitting protective goggles.

Skin protection: Protective clothing.
